2

FORWARD-LOOKING STATEMENTS

Statements in this Quarterly Report on Form 10-Q that are not descriptions of historical facts are forward-looking statements that are based on management's current expectations and assumptions and are subject to risks and uncertainties. If such risks or uncertainties materialize or such assumptions prove incorrect, our business, operating results, financial condition and stock price could be materially negatively affected. In some cases, you can identify forward-looking statements by terminology including "anticipates," "believes," "can," "continue," "could," "estimates," "expects," "intends," "may," "plans," "potential," "predicts," "should," "will," "would" or the negative of these terms or other comparable terminology. Factors that could cause actual results to differ materially from those currently anticipated include those set forth in the section titled "Risk Factors" including, without limitation, risks relating to:

- the results of our research and development activities, including uncertainties relating to the discovery of potential product candidates and the preclinical and clinical testing of our product candidates;
- the early stage of our product candidates presently under development;
- our need for substantial additional funds in order to continue our operations, and the uncertainty of whether we will be able to obtain the funding we need;
- our ability to obtain and, if obtained, maintain regulatory approval of our current product candidates, and any of our other future product candidates, and any related restrictions, limitations, and/or warnings in the label of any approved product candidate;
- our ability to retain or hire key scientific or management personnel;
- our ability to protect our intellectual property rights that are valuable to our business, including patent and other intellectual property rights;
- our dependence on the University of Mississippi, third-party manufacturers, suppliers, research organizations, testing laboratories and other potential collaboratories;
- · our ability to develop successful sales and marketing capabilities in the future as needed;
- the size and growth of the potential markets for any of our approved product candidates, and the rate and degree of market acceptance of any of our approved product candidates;
- competition in our industry; and
- regulatory developments in the United States and foreign countries.

We operate in a rapidly-changing environment and new risks emerge from time to time. As a result, it is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this report may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements. You should not rely upon forward-looking statements as predictions of future events. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that the future results, levels of activity, performance or events and circumstances reflected in the forward-looking statements will be achieved or occur. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of the forward-looking statements. The forward-looking statements included in this report speak only as of the date hereof, and except as required by law, we undertake no obligation to update publicly any forward-looking statements for any reason after the date of this report to conform these statements to actual results or to changes in our expectations.

- During the nine months ended September 30, 2015, the Company issued 200,000 warrants to purchase shares of our common stock for consulting services. The (1) warrants were valued at \$417,875. The Company also issued shares of common stock for consulting services valued at \$168,000. Such amounts were recorded as a Prepaid Expense and are being amortized over the service period.
- The Company issued 6,000 warrants at an exercise price of \$2.50 to a service provider in exchange for extinguishment of \$10,000 of trade accounts payable (2) owed to this vendor.

See accompanying notes to the unaudited consolidated financial statements.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

1. Nature of Operations, Business Activities and Summary of Significant Accounting Policies

Nature of Operations and Basis of Presentation

Nemus Bioscience, Inc. is a biopharmaceutical company that plans to develop and commercialize therapeutics from cannabinoids through a partnership with the University of Mississippi. The University of Mississippi ("UM") is federally permitted and licensed to cultivate cannabis for research and commercial purposes. Unless otherwise specified, references in these Notes to the Unaudited Consolidated Financial Statements to the "Company," "we" or "our" refer to Nemus Bioscience, Inc., a Nevada corporation formerly known as Load Guard Logistics, Inc. ("LGL"), together with its wholly-owned subsidiary, Nemus, a California corporation ("Nemus"). Nemus became the wholly owned subsidiary of Nemus Bioscience, Inc. through the Merger (as defined below).

Nemus Bioscience, Inc. (formerly LGL) was incorporated in Nevada on March 16, 2011. Nemus was incorporated in California on July 17, 2012. Our headquarters are located in Costa Mesa, California.

As of September 30, 2015, the Company has devoted substantially all of its efforts to securing product licenses, raising capital, and building infrastructure, and has not realized revenue from its planned principal operations.

Business Activities

On October 31, 2014, pursuant to an Agreement and Plan of Merger, dated October 17, 2014 (the "Merger Agreement"), LGL, Nemus Acquisition Corp. ("Acquisition Sub"), Nemus Bioscience, Inc. ("Name Change Merger Sub"), and Nemus, Acquisition Sub merged with and into Nemus and Nemus survived as a whollyowned subsidiary of LGL (the "Merger"). Immediately after the Merger, LGL changed its name to "Nemus Bioscience, Inc." by merging with Name Change Merger Sub. Pursuant to the Merger Agreement, each share of Nemus common stock outstanding totaling 12,880,000 shares was exchanged at a 1:1 conversion rate to LGL shares and when combined with the 3,120,000 shares of LGL common stock outstanding, amounted to 16,000,000 total shares outstanding upon completion of the merger.

The Merger is being accounted for as a reverse-merger and recapitalization. Nemus is the acquirer for financial reporting purposes and LGL is the acquired company. Consequently, the assets and liabilities and the operations that will be reflected in the historical consolidated financial statements prior to the Merger will be those of Nemus and will be recorded at the historical cost basis of Nemus, and the consolidated financial statements after completion of the Merger will include the assets and liabilities of LGL and Nemus, the historical operations of Nemus and the operations of the Nemus from and after the closing date of the Merger.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expense during the reporting period. Actual results could differ from those estimates.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

Liquidity and Going Concern

The Company has incurred operating losses and negative cash flows from operations since our inception. As of September 30, 2015, we had cash and cash equivalents of \$4,342,722. The Company anticipates that it will continue to incur net losses into the foreseeable future as it continues to advance and develop a number of potential drug candidates into preclinical development activities and expands its corporate infrastructure which includes the costs associated with being a public company. Without additional funding, management believes that the Company will not have sufficient funds to meet its obligations within one year after the date the consolidated financial statements are issued. These conditions give rise to substantial doubt as to the Company's ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

The Company plans to continue to fund its losses from operations and capital funding needs through public or private equity or debt financings, strategic collaborations, licensing arrangements, asset sales, government grants or other arrangements. However, the Company cannot be sure that such additional funds will be available on reasonable terms, or at all. If the Company raises additional funds by issuing equity securities, substantial dilution to existing stockholders would result. If the Company is unable to secure adequate additional funding, the Company may be forced to make a reduction in spending, extend payment terms with suppliers, liquidate assets where possible, and/or suspend or curtail planned programs.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents. The carrying value of those investments approximates their fair market value due to their short maturity and liquidity. Cash and cash equivalents include cash on hand and amounts on deposit with financial institutions, which amounts may at times exceed federally insured limits. The Company has not experienced any losses on such accounts and does not believe it is exposed to any significant credit risk.

Restricted Cash

A deposit of \$37,500 as of September 30, 2015 was restricted from withdrawal and held by a bank in the form of a certificate of deposit. This certificate served as collateral for payment of the Company's credit cards. Restricted cash as of December 31, 2014 was \$0.

Fair Value Measurements

Certain assets and liabilities are carried at fair value under U.S. GAAP. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. A fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last is considered unobservable, is used to measure fair value:

- Level 1: Valuations for assets and liabilities traded in active markets from readily available pricing sources such as quoted prices in active markets for identical assets or liabilities.
- Level 2: Observable inputs (other than Level 1 quoted prices) such as quoted prices in active markets for similar assets or liabilities, quoted prices in markets that are not active for identical or similar assets or liabilities, or other inputs that are observable or can be corroborated by observable market data.
- Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to determining the fair value of the assets or liabilities, including pricing models, discounted cash flow methodologies and similar techniques.

The carrying values of our financial instruments, including, cash and cash equivalents, prepaid expenses, accounts payable, and accrued expenses approximate their fair value due to the short maturities of these financial instruments.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

Property and Equipment, Net

As of September 30, 2015, property and equipment, net, was \$16,046, consisting primarily of computers and equipment. The Company had \$21,354 of property and equipment, net, as of December 31, 2014. Expenditures for additions, renewals and improvements will be capitalized at cost. Depreciation will generally be computed on a straight-line method based on the estimated useful life of the related assets currently ranging from two to three years. Maintenance and repairs that do not extend the life of assets are charged to expense when incurred. When properties are disposed of, the related costs and accumulated depreciation are removed from the accounts and any gain or loss is reported in the period the transaction takes place.

Property and equipment are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted cash flows expected to be generated by the asset. If the carrying amount exceeds its estimated future undiscounted cash flows, an impairment charge is recognized by the amount by which the carrying amount exceeds the fair value of the asset.

The costs incurred for the rights to use licensed technologies in the research and development process, including licensing fees and milestone payments, will be charged to research and development expense as incurred in situations where the Company has not identified an alternative future use for the acquired rights, and are capitalized in situations where there is an identified alternative future use. No cost associated with the use of licensed technologies has been capitalized to date.

Income Taxes

The Company accounts for our deferred income tax assets and liabilities based on differences between the financial reporting and tax bases of assets and liabilities, and net operating loss carry forwards (the "NOLs") and other tax credit carry forwards. These items are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in the period that includes the enactment date. Any interest or penalties would be recorded in the Company's statement of operations in the period incurred.

The Company records a valuation allowance to reduce the deferred income tax assets to the amount that is more likely than not to be realized. In making such determinations, management considers all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies and recent financial operations. As a result there are no income tax benefits reflected in the statement of operations to offset pre-tax losses.

The Company recognizes a tax benefit from uncertain tax positions when it is more likely than not that the position will be sustained upon examination, including resolutions of any related appeals or litigation processes, based on the technical merits of the position.

Revenue Recognition

The Company has not begun planned principal operations and has not generated any revenue since inception.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

Research and Development Expenses

Research and development ("R&D") costs are expensed when incurred. These costs may consist of external research and development expenses incurred under agreements with third-party contract research organizations and investigative sites, third-party manufacturing organizations and consultants; employee-related expenses, which include salaries, benefits and stock-based compensation for the personnel involved in our preclinical and clinical drug development activities; and facilities expense, depreciation and other allocated expenses; and equipment and laboratory supplies.

Stock-Based Compensation Expenses

Stock-based compensation cost is estimated at the grant date based on the fair value of the award, and the cost is recognized as expense ratably over the vesting period. We use the Black-Scholes option pricing model for estimating the grant date fair value of stock options and warrants using the following assumptions:

- Exercise price We determined the exercise price based on valuations using the best information available to management at the time of the valuations.
- · Volatility We estimate the stock price volatility based on industry peers who are also in the early development stage given the limited market data available in the public arena.
- · Expected term The expected term is based on a simplified method which defines the life as the average of the contractual term of the options and warrants and the weighted-average vesting period for all open awards.
- · Risk-free rate The risk-free interest rate for the expected term of the option or warrant is based on the average market rate on U.S. treasury securities in effect during the quarter in which the awards were granted.
- · Dividends The dividend yield assumption is based on our history and expectation of paying no dividends.

Stock-Based Compensation for Non-Employees

The Company accounts for warrants and options issued to non-employees under ASC 505-50, Equity – Equity Based Payments to Non-Employees, using the Black-Scholes option-pricing model. The value of such non-employee awards are periodically re-measured over the vesting terms and at each quarter end.

Segment Information

The Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") No. 280, "Segment Reporting" establishes standards for reporting information about reportable segments. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision-making group ("CODM"), in deciding how to allocate resources and in assessing performance. The CODM evaluates revenues and gross profits based on product lines and routes to market. Based on the early development stage of our operation, we operate in a single reportable segment.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

Comprehensive Income (Loss)

Comprehensive income (loss) is defined as the change in equity during a period from transactions and other events and circumstances from non-owner sources. The Company is required to record all components of comprehensive loss in the consolidated financial statements in the period in which they are recognized. Net income (loss) and other comprehensive loss, net of their related tax effect, arrived at a comprehensive loss. For the three and nine months ended September 30, 2015 and 2014, the comprehensive loss was equal to the net loss.

Earnings per share

The Company applies FASB ASC 260, "Earnings per Share." Basic earnings (loss) per share is computed by dividing earnings (loss) available to common stockholders by the weighted-average number of common shares outstanding. Diluted earnings or loss per share would include the dilutive effect of awards granted to employees under stock-based compensation plans, if any. There were no dilutive awards outstanding at September 30, 2015.

2. University of Mississippi ("UM") Agreements

In July 2013, the Company entered into a Memorandum of Understanding (MOU) with the UM to engage in joint research of extracting, manipulating, and studying cannabis in certain forms to develop intellectual property (IP) with the intention to create and commercialize therapeutic medicines. Nemus will own all IP developed solely by its employees and will jointly own all IP developed jointly between Nemus and UM employees. The term of the MOU agreement is five years and the parties agree to negotiate separate Research agreements upon the identification of patentable technologies as well as any deemed to be a trade secret. The agreement may be terminated by either party with three months written notice to the other party.

On May 15, 2014, the Company entered into an Option Agreement in which UM granted us a three-month option for conducting due diligence to exclusively license a suppository dosage form containing Dronabinol Hemi succinate and other esters ("NPC 4718").

As a result of our due diligence, on September 29, 2014, the Company executed three license agreements with UM pursuant to which UM granted us exclusive, perpetual, worldwide licenses, including the right to sublicense, to intellectual property related to UM5050, a pro-drug formulation of tetrahydrocannabinol, or THC for products administered through each of ocular, oral or rectal delivery. The license agreement for the field of oral delivery also includes rights to UM 1250, a bio-adhesive hot melt extruded film for topical and mucosal adhesion application and drug delivery. The license agreements contain certain milestone and royalty payments, as defined therein. These licenses also require the Company to reimburse UM for patent costs incurred related to these products under license. In the case of the ocular license the Company was required to reimburse sunk patent expenses of \$70,678 in February 2015; this amount was reflected in accrued license and patent reimbursement fees as of December 31, 2014. These license agreements will terminate upon expiration of the patents, breach or default of the license agreements, or upon 60 days written notice by the Company to UM.

On October 15, 2014, we signed a renewable option agreement for the rights to explore other routes of delivery of UM5050 not yet agreed upon and/or in combination with other cannabinoids or other compatible compounds. There was a one-time up-front option payment and the option period was for six months expiring on March 31, 2015. On September 29, 2015, the Company exercised its right to renew for an additional six months under the same financial terms and conditions.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

On July 1, 2014, the Company entered into three additional Option Agreements, pursuant to which UM granted Nemus three-month exclusive options for conducting due diligence on the following three cannabinoid extracts to exclusively license them for the purposes of obtaining FDA approval and commercializing the extracts:

- 1) UM 1490 transmucosal delivery of cannabinoids
- 2) UM 5070 treatment for methicillin-resistant Staphylococcus aureus (MRSA) infections
- 3) UM 8790 ocular delivery of cannabinoids

In March of 2015, in lieu of a license agreement, the Company entered into a research agreement with UM to begin studies concerning the medical utility of cannabinoids as anti-infective therapeutics for MRSA. The fee payable to UM under the agreement is based on the achievement of certain milestones in the project. The Company recognized \$18,673 and \$66,747 of research and development expense for the three and nine months ending September 30, 2015 which represents work completed to date under this contract. The agreement also grants an exclusive option to license the technology from the University within 180 days from the commencement of the agreement. Either party may terminate the agreement with 30 days written notice.

In July of 2015, the Company entered into a research agreement with UM to begin studies concerning research and development of cannabidiol (CBD) formulations. The fee payable to UM is based on the achievement of certain milestones in the project. The Company recognized \$37,119 of research and development expense for both the three and nine months ending September 30, 2015 which represents work completed to date under this contract. The agreement also grants an exclusive option to license the technology from the University within 180 days from the commencement of the agreement. Either party may terminate the agreement with 30 days written notice.

In September of 2015, the Company entered into a research agreement with UM to advance NEMUS' lead proprietary cannabinoid-based therapy (UM5050) developed for the treatment and management of glaucoma into an optimized once-daily treatment formulation. The fee payable to UM is based on the achievement of certain milestones in the project. The Company recognized \$21,496 of research and development expense for both the three and nine months ending September 30, 2015 which represents work completed to date under this contract. The agreement also grants an exclusive option to license the technology from the University within 180 days from the commencement of the agreement. Either party may terminate the agreement with 30 days written notice.

3. Commitments and Contingencies

Lease Commitments

The Company leased temporary headquarters facilities under a month-to-month operating lease agreement. This lease was terminated effective December 31, 2014. Monthly rent expense under this lease was \$2,060.

On September 1, 2014, the Company signed an operating lease for laboratory and office space at the Innovation Hub, Insight Park located on the University of Mississippi campus. The lease term commenced on October 1, 2014 and expires on December 31, 2017. There are annual escalating rent provisions and two months of free rent in the agreement. The total cash payments over the life of the lease are divided by the total number of months in the lease period and the average rent will be charged to expense each month during the lease period. The monthly amount charged to rent expense is \$9,000.

In October of 2014, we signed a lease agreement for our corporate office headquarters that consists of approximately 4,087 square feet located at 650 Town Center Drive, Suite 1770, Costa Mesa, CA 92626. The lease expires on October 31, 2016 and our monthly rent is \$5,373, payable in equal monthly installments with annual escalations.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

Total net rent expense related to our operating leases for the nine months ended September 30, 2015 and 2014 was \$170,931 and \$6,844, respectively. For the three months ended September 30, 2015 and 2014, total net rent expense was \$56,680 and \$6,294.

Future minimum payments under the non-cancelable portion of our operating leases as of September 30, 2015 are as follows:

For the year ending December 31,

2015	\$ 43,900
2016	165,700
2017	165,700 85,900
2018	-
2019	-
Thereafter	-
Total	\$ 295,500

Independent Contractor Agreements

The Company has entered into independent contractor agreements with individuals that are operating in the capacity of our management team, or that are serving in an advisory role. Certain agreements expired once the individuals became full-time employees. Independent contractor expense for the nine months ended September 30, 2015 was \$90,000 and for the nine months ended September 30, 2014 was \$353,000. Two of these contractors accounted for 30% and 15% respectively of our total expenditures for the nine months ended September 30, 2014. There was no significant independent contractor expense as a percent of our total expenditures for the nine months ended September 30, 2015.

Legal Matters

General Litigation and Disputes

From time to time, in the normal course of our operations, we may be a party to litigation and other dispute matters and claims. Currently Nemus is not party to any litigation, dispute matters or claims. Litigation can be expensive and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict and our view of these matters may change in the future as the litigation and events related thereto unfold. An unfavorable outcome to any legal matter, if material, could have a materially adverse effect on our operations or our financial position, liquidity or results of operations.

Government Proceedings

Like other companies in the pharmaceutical industry, we are subject to extensive regulation by national, state and local government agencies in the United States. As a result, interaction with government agencies occurs in the normal course of our operations. It is possible that criminal charges and substantial fines and/or civil penalties or damages could result from any government investigation or proceeding. As of September 30, 2015, the Company had no current proceedings or inquiries.

Change in Control Severance Plan

In February 2015, we adopted a change in control severance plan, in which our named executive officers participate, that provides for the payment of severance benefits if the executive's service is terminated within twelve months following a change in control, either due to a termination without cause or upon a resignation for good reason (as each term is defined in the plan).

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

In either such event, and provided the executive timely executes and does not revoke a general release of claims against the Company, he or she will be entitled to receive: (i) a lump sum cash payment equal to at least six months of the executive's monthly compensation, plus an additional month for each full year of service over six years, (ii) Company-paid premiums for continued health insurance for a period equal to length of the cash severance period or, if earlier, when executive becomes covered under a subsequent employer's healthcare plan, and (iii) full vesting of all then-outstanding unvested stock options and restricted stock awards.

4. Stockholders' Deficit and Redeemable Convertible Series B Preferred Stock

Common Stock

On July 17, 2012, the Company issued 7,770,000 shares of common stock with no par value and warrants (see first paragraph under warrants below) to its founders and one board member in exchange for the services provided to establish Nemus, valued at approximately \$1,000.

In June of 2014, the Company sold 1,800,000 shares of common stock with no par value and warrants for a purchase price of \$900,000 (the "June 2014 Stock Purchase Agreement") to a group of private investors. See additional discussion on warrants below.

In August of 2014, the Company sold 2,200,000 shares of common stock with no par value and warrants for a purchase price of \$1,100,000 to a group of private investors. See additional discussion on warrants below.

In October of 2014, the Company issued 1,110,000 shares of common stock with no par value to eighteen individual investors that had participated in a prior entity founded by Nemus' then current president. Such entity has been insolvent and not operating since the inception date of Nemus. The issuance of these shares was in exchange for the signing of a release of claims against the Company, its President, and the former entity. The Company recorded a general and administrative expense of \$466,200 in the fourth quarter of 2014 to reflect the fair market value of the common stock issued was determined via an independent third-party valuation conducted as of October 31, 2014.

In January of 2015, the Company sold 241,663 shares of common stock with par value of \$0.001 for a purchase price of \$724,989 to a group of private investors.

In March of 2015, the Company issued 24,000 shares of common stock with par value of \$0.001 to a third party in exchange for services to be performed related to raising additional capital. The Company recorded a prepaid expense of \$168,000 in the first quarter to reflect the fair market value of the common stock issued and is amortizing this expense over the contract service period which is one year. The fair market value was determined utilizing the Company's closing stock price as of the commencement date of the contract service period. For the nine months ended September 30, 2015, the Company amortized \$113,806 to general and administrative expense.

In August 2015, in conjunction with the Series B Preferred Stock sale (discussed below), the Company raised \$5.0 million at \$1,000 per share resulting in the automatic conversion of the Series A Preferred Stock to common stock. This resulted in the conversion of 580,000 shares of Series A Preferred Stock at \$2.50 per share to the equivalent of 1,812,500 shares of common stock.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

Preferred Stock

The Company has authorized 20,000,000 shares of preferred stock with a par value of \$0.001 per share.

Series A Preferred Stock: In April 2015, the Company sold 250,000 shares of Series A preferred stock with par value of \$0.001 and 50,000 warrants to purchase the Company's common stock for an aggregate purchase price of \$625,000, or \$2,50 per share to a group of private investors. The shares of preferred stock automatically convert to shares of common stock either at (i) a subsequent equity financing of at least \$1,000,000 or (ii) October 1, 2015, whichever is earlier. The warrants are exercisable at a price of \$5.00 per share and expire five years from the issuance date. In May 2015, the Company sold 150,000 shares and 30,000 warrants and in July 2015, 180,000 shares and 36,000 warrants under the same terms and conditions.

The Series A preferred stock issued also has a "down-round" protection feature provided to the investors if the Company subsequently issues or sells any shares in a round of equity financing of at least \$1,000,000 prior to October 1, 2015 in which the shares of common stock to be acquired are at a price less than \$2.50 per share. The Company is required to issue additional shares of common stock to the investors in an amount such that the subscription price paid, when divided by the total number of shares issued will result in an actual price paid per share of common stock equal to such lower price. This conversion occurred as discussed above in conjunction with the Series B Preferred Stock financing totaling \$5.0 million and resulted in the conversion of 580,000 shares of Series A Preferred Stock at to 1,812,500 shares of common stock.

Redeemable Convertible Series B Preferred Stock: In August 2015, the Company sold 5,000 shares of Series B Convertible Preferred Stock and warrants to purchase 6,250,000 shares of the Company's common stock for an aggregate purchase price of \$1,000 per share resulting in gross proceeds of \$5.0 million. Each share of preferred stock is convertible into 1,250 shares of common stock which results in an effective conversion price of \$0.80 per common share and can be converted by the holder at any time. The Series B preferred stock issued also has a "down-round" protection feature provided to the investors if the Company subsequently issues or sell any shares of common stock, stock options, or convertible securities at a price less than the conversion price of \$0.80 per common share. The conversion price is automatically adjusted down to the price of the instrument being issued. See additional discussion in Note 5 below. The Series B shares have liquidation preference over other preferred shares and common stock and have voting rights equal to the number of common shares into which each holder's preferred stock is convertible as of the record date. The preferred stock has no dividend rights. If dividends are declared on the common stock, the holders of the preferred stock shall be entitled to participate in such dividends on an as-if converted basis. The warrants are exercisable at a price of \$1.15 per share and expire five years from the issuance date. See additional discussion regarding these warrants in Note 6 below.

In the event of any liquidation, dissolution or winding up of the Company, either voluntary or involuntary, Series B preferred stockholders receive an amount per share equal to the conversion price of \$0.80, subject to down-round adjustment, multiplied by the as-if converted share amount of 6,250,000 common shares, totaling \$5.0 million. If upon the liquidation, the assets are insufficient to permit payments to the Series B holders, all assets legally available will be distributed in a pro rata basis among the Series B holders in proportion to the full amounts they would otherwise be entitled to receive. Any remaining assets are distributed pro rata among the common stockholders.

Subject to certain trigger events occurring, the Series B preferred stock holders have the right to force the Company to redeem the shares of preferred stock at a price per preferred share equal to the greater of (A) 115% of the conversion amount and (B) the product of (1) the conversion rate in effect at such time and (2) the greatest closing sale price of the Common Stock during the period beginning on the date immediately preceding such triggering event and ending on the date such holder delivers the notice of redemption. Such triggering events include:

- Failure of the Series B Registration Statement to be declared effective by the SEC on or prior to the date that is ninety days after the Effectiveness Deadline:
- Suspension of the Company's common stock from trading for a period of (2) consecutive trading days;
- Failure of the Company to deliver all the shares of the common stock or make the appropriate cash payments in a timely manner upon conversion of the Series B Preferred;
- Any default of indebtedness;
- Any filing of voluntary or involuntary bankruptcy by the Company;
- A final judgment in excess of \$100,000 rendered against the Company;
- Breach of representations and warranties in the Stock Purchase Agreement;
- Failure to comply with the Series B Certificate of Designation or Rule 144 requirements.

As certain of these triggering events are considered to be outside the control of the Company, the Series B preferred stock is considered to be contingently redeemable convertible and as a result, has been classified as mezzanine equity in the Company's balance sheet presentation.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

Warrants

On July 17, 2012, the Company issued warrants to purchase up to 3,000,000 shares of our common stock to its founders and two advisors in consideration for services provided in the start-up of operations. The warrants are exercisable at a price of \$1.00 per share and expire on June 20, 2023. The Company valued these warrants utilizing the Black-Scholes valuation model and they were determined to be of nominal value given the start-up nature of the Company's operations at the time of grant.

In conjunction with the June 2014 Stock Purchase Agreement, the Company issued warrants to purchase up to 450,000 shares of common stock to a group of private investors. The warrants are exercisable at a price of \$1.00 per share and expire on June 12, 2020. The Company valued these warrants at \$85,500. This amount was recorded as warrants and was reclassified from the total consideration received for both the common stock and warrants purchased.

In August 2014 as part of the June 2014 Stock Purchase Agreement, the Company issued warrants to purchase up to 550,000 shares of common stock with an exercise price of \$1.00 per share that expire in August 2020. The Company valued these warrants at \$104,500. This amount was recorded as warrants and was reclassified from the total consideration received for both the common stock and warrants purchased.

In March 2015, the Company entered into an agreement with a financial advisory and public relations consulting firm which included the issuance of warrants to purchase up to 90,000 shares of common stock with an exercise price of \$2.50 per share with a term of five years. These warrants were in exchange for services performed beginning in the first quarter and were subsequently issued in April 2015. The Company estimated the warrant value to be \$67,950 utilizing the Black Scholes option pricing model and amortized \$9,225 for services provided through September 30, 2015.

In April 2015, the Company entered into an agreement with one of its investors to provide advisory services on all matters including financing. In conjunction with this agreement, the Company issued warrants that vest immediately to purchase 100,000 shares of common stock with an exercise price of \$5.00 per share with a term of ten years. The Company estimated the warrant value to be \$326,000 utilizing the Black Scholes option pricing model and recorded this amount to general and administrative expense for the quarter due to the immediate vesting.

In April 2015, the Company issued to a former service providerin exchange for payment of its outstanding invoice warrants that vest immediately to purchase 6,000 shares of common stock with an exercise price of \$2.50 per share. The Company estimated the warrant value to be \$10,000 which represented the value of the trade debt extinguished.

In April 2015, the Company issued 50,000 warrants to purchase the Company's common stock in conjunction with its Series A Preferred Stock financing. The warrants are exercisable at a price of \$5.00 per share and expire five years from the issuance date. In May 2015, the Company issued 30,000 warrants and in July 2015, 36,000 warrants under the same terms and conditions.

In June 2015, the Company issued to a service provider in exchange for consulting services warrants that vest immediately to purchase 10,000 shares of common stock with an exercise price of \$5.00 per share with a term of five years. The Company estimated the warrant value to be \$14,700 utilizing the Black Scholes option pricing model.

In August 2015, the Company issued 6,250,000 warrants to purchase common stock in conjunction with its Series B Preferred Stock financing. See further discussion in Note 6 below.

In August 2015, the Company issued 187,500 warrants to purchase common stock to its investment banker in exchange for services rendered in conjunction with the Series B Preferred Stock financing. The warrants vest immediately and have an exercise price of \$1.15 per share. The Company estimated the value of the warrants to be \$86,250 utilizing the Black Scholes option pricing model and recorded this amount to offering costs as an offset to Additional Paid-in-Capital.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

The Company's board of directors considered various objective and subjective factors, along with input from management, to determine the fair value of the warrants, including:

- · Contemporaneous valuation prepared by an independent third-party valuation specialist effective as of June 30, 2014, October 31, 2014, and April 1, 2015, and August 20, 2015,
- · Its results of operations, financial position and the status of research and development efforts and achievement of enterprise milestones,
- · The composition of, and changes to, the Company's management team and board of directors,
- The lack of liquidity of its common stock as a newly public company,
- · The Company's stage of development, business strategy and the material risks related to its business and industry,
- · The valuation of publicly-traded companies in the biotechnology sectors,
- External market conditions affecting the biotechnology industry sectors,
- · The likelihood of achieving a liquidity event for the holders of its common stock, such as an initial public offering, or IPO, or a sale of the Company, given prevailing market conditions, and
- The state of the IPO market for similarly situated biotechnology companies,
- · Discussions held with bankers, potential investors, and preliminary term sheets received as part of management's capital raise efforts.

There are significant judgments and estimates inherent in the determination of the fair value of the Company's warrants. These judgments and estimates included the assumptions regarding its future operating performance, the time to completing an IPO or other liquidity event and the determination of the appropriate valuation methods. If the Company had made different assumptions, its warrant valuation could have been significantly different.

Stock Option Plans: 2014 Omnibus Incentive Plan

The 2014 Omnibus Incentive Plan (the "2014 Plan") was adopted to provide a means by which officers, non-employee directors, and employees of and consultants to the Company and its affiliates could be given an opportunity to acquire an equity interest in the Company. All officers, non-employee directors, and employees of and consultants to the Company are eligible to participate in the 2014 Plan.

On October 31, 2014, after the closing of the Merger, our Board of Directors approved the 2014 Plan. The 2014 Plan reserved 3,200,000 shares for future grants. As of September 30, 2015, options (net of canceled or expired options) covering an aggregate of 1,180,000 shares of the Company's common stock had been granted under the 2014 Plan, and the Company had 1,180,000 options outstanding and 2,020,000 shares available for future grants under the 2014 Plan.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

Options granted under the 2014 Plan expire no later than 10 years from the date of grant. Options granted under the 2014 Plan may be either incentive or non-qualified stock options. For incentive and non-qualified stock option grants, the option price shall be at least 100% of the fair value on the date of grants, as determined by the Company's Board of Directors. If at any time the Company grants an option, and the optionee directly or by attribution owns stock possessing more than 10% of the total combined voting power of all classes of stock of the Company, the option price shall be at least 110% of the fair value and shall not be exercisable more than five years after the date of grant.

Options granted under the 2014 Plan may be immediately exercisable if permitted in the specific grant approved by the Board of Directors and, if exercised early may be subject to repurchase provisions. The shares acquired generally vest over a period of five years from the date of grant. The Company granted options to purchase 1,180,000 shares through September 30, 2015, under the 2014 Plan.

The following is a summary of activity under the 2014 Plan as of September, 2015:

			Optio	ns Outstanding	3	
	Shares Available for Grant of Options	Number of Shares	Price per Share			Weighted Average Exercise Price
Balance at December 31, 2014	1,470,000	1,730,000	\$	0.42	\$	0.42
Options granted	(130,000)	130,000	\$	1.15 - \$3.00	\$	2.29
Options exercised	-	-				
Options cancelled	680,000	(680,000)	\$	0.42	\$	0.42
Balance at September 30, 2015	2,020,000	1,180,000	\$	0.42 - \$3.00	\$	0.63

The weighted average remaining contractual life in years of the options outstanding as of September 30, 2015 was 9.18 years.

Aggregate intrinsic value is the sum of the amounts by which the quoted market price of the Company's stock exceeded the exercise price of the stock options at September 30, 2015 for those stock options for which the quoted market price was in excess of the exercise price ("in-the-money options"). As of September 30, 2015, the aggregate intrinsic value of options outstanding was \$147,000. As of September 30, 2015, no options to purchase shares of common stock were exercisable.

Stock Based Compensation Expense

The Company recognizes stock-based compensation expense based on the fair value of that portion of stock options that are ultimately expected to vest during the period. Stock-based compensation expense recognized in the consolidated statement of operations includes compensation expense for stock-based awards based on the estimated grant date fair value over the requisite service period. For the nine months ended September 30, 2015, the Company recognized stock-based compensation expense of \$263,985 which was recorded as a general and administrative expense in the consolidated statement of operations. For the nine months ended September 30, 2014, stock-based compensation expense was \$0.

The total amount of unrecognized compensation cost related to non-vested stock options was \$1,477,143 as of September 30, 2015. This amount will be recognized over a weighted average period of 4.14 years.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

Valuation Assumptions

The fair value of options was estimated at the date of grant using the Black-Scholes option pricing model. Expected volatility is based on the historical volatility of the Company's common stock for similar terms. The expected term was estimated using the simplified method as permitted under SAB No. 110, since the Company has no recent exercise or forfeiture history that is representative of options granted during the year. The expected term represents the estimated period of time that stock options are expected to be outstanding, which is less than the contractual term which is generally ten years. The risk-free interest rate is based on the U.S. Treasury yield. The expected dividend yield is zero, as the Company does not anticipate paying dividends in the near future. The weighted average assumptions for employee options are as follows:

		September 30,		
	2015	2014		
Dividend yield	0.00%	NA		
Volatility factor	75.00%	NA		
Risk-free interest rate	1.68-1.85%	NA		
Expected term (years)	6.25-6.50	NA		
Weighted-average fair value of options granted during the periods	\$2.69	NA		

5. Provision for Conversion of Preferred Stock

Series A Preferred Stock Conversion Liability

In connection with the Series A preferred stock financing, the Company recorded a liability related to down-round protection provided to the stockholders in the event that the Company does another offering of common stock greater than \$1,000,000 at a price below \$2.50 per share. The down-round provision expires at the closing of a subsequent financing round or October 1, 2015 whichever is earlier. With the assistance of a third-party valuation specialist, the Company valued the conversion liability pursuant to the accounting guidance of ASC 820-10, Fair Value Measurements, as of the closing date of the first round of financing which was April 1, 2015.

As of June 30, 2015, the Company re-evaluated the likelihood and valuation of a potential down-round given that management has been actively pursuing capital raising efforts. In the absence of any definitive agreement, the Company calculated the fair value of the conversion feature to be \$700,000 by determining the highest probability of a per share price in the next anticipated round of financing, after considering all discussions with bankers, potential investors, and preliminary term sheets. This amount was booked as a current liability as of June 30, 2015 and was charged as a non-operating expense for the period.

In July of 2015, the Company increased its down-round provision by \$286,000 based on the closing of an additional round of 180,000 Series A shares by determining the highest probability of a per share price in the next anticipated round of financing, after considering all discussions with bankers, potential investors, and preliminary term sheets. This amount was charged to non-operating expense for the three months ended September 30, 2015.

As of August 21, 2015, upon the closing of the Series B Preferred Stock sale with proceeds totaling \$5.0 million, the Company issued 1,232,000 additional shares of common stock at \$0.80 per share thereby eliminating this liability of \$986,000 and offsetting it to Additional Paid-in-Capital. This amount was calculated by determining the difference in per share pricing between the Series A Preferred Stock financing of \$2.50 per share and the Series B Preferred Stock Financing of \$0.80 per share multiplied by the 580,000 total shares included in the Series A offering.

Series B Preferred Stock Conversion Liability

As of August 20, 2015, in connection with the Series B preferred stock financing, the Company recorded a liability related to down-round protection provided to the stockholders in the event that the Company does another sale or issuance of common stock, stock options or convertible securities where the share price is below \$0.80 per share. With the assistance of a third-party valuation specialist, the Company valued the conversion liability pursuant to the accounting guidance of ASC 820-10, Fair Value Measurements, as of the closing date of the financing. The Company also performed a review of the conversion liability in conjunction with ASC 815, Derivatives and Hedging/Contracts in Entity's Own Equity, and determined that the liability requires bifurcation and re-measurement to fair market value at the end of each reporting period. The derivative was valued at \$75,488 and was booked as a current liability as of September 30, 2015. The value of this embedded derivative was determined utilizing a with and without method by valuing the preferred stock with and without the down round protection.

(Information as of and for the three and nine month periods ended September 30, 2015 and 2014 is unaudited)

6. Series B Warrants

In conjunction with the Series B Preferred Stock financing, the Company issued 6,437,500 warrants that are exercisable at a price of \$1.15 per share and expire five years from the issuance date. The warrants were valued at \$2,935,800 utilizing the Black-Scholes pricing model and the following assumptions:

	For the Nine Mon September 30,	For the Nine Months Ended September 30,		
	2015	2014		
Dividend yield	0.00%	NA		
Volatility factor	70.00%	NA		
Risk-free interest rate	1.75%	NA		
Expected term (years)	4.61	NA		
Weighted-average fair value of warrants granted during the periods	\$0.46	NA		

The warrants are exercisable in cash or through a cashless exercise provision. The Series B warrants also have a "down-round" protection feature provided to the investors if the Company subsequently issues or sell any shares of common stock, stock options, or convertible securities at a price less than the exercise price of \$1.15 per each warrant. The conversion price is automatically adjusted down to the price of the instrument being issued. The Company reviewed the classification of the warrants as liabilities or equity under the guidance of ASC 480-10, *Distinguishing Liabilities from Equity*, and concluded that the Series B warrants should be classified as a liability. The Company then applied the relative fair value allocation methodology for allocating the proceeds of \$5.0 million received from the Series B financing between the conversion liability and the warrants with the residual amount being allocated to the Preferred Stock. As such, the warrant value as of September 30, 2015 was \$2,892,392 and will be subject to fair value re-measurement at the end of each reporting period.

7. Income Taxes

At September 30, 2015, the Company had net operating loss carry forwards ("NOLs") aggregating approximately \$4,023,000 which, if not used, expire in 2035. The utilization of these NOLs may become subject to limitations based on past and future changes in ownership of the Company pursuant to Internal Revenue Code Section 382.

The Company records a valuation allowance against deferred tax assets to the extent that it is more likely than not that some portion, or all of, the deferred tax assets will not be realized. Due to the substantial doubt related to the Company's ability to utilize its deferred tax assets, a valuation allowance for the full amount of the deferred tax assets has been established at September 30, 2015. As a result of this valuation allowance there are no income tax benefits reflected in the accompanying statement of operations to offset pre-tax losses.

The Company has no uncertain tax positions as of September 30, 2015.

8. Subsequent Events

Restricted Stock Awards

Restricted stock awards ("RSAs") are granted to our board of directors and members of senior management and are issued pursuant to the Company's 2014 Omnibus Incentive Plan. On October 20, 2015, a total of 1,200,000 RSAs were granted to members of the Company's senior management and board of directors with a fair market value of approximately \$900,000. These RSAs vest from one to three years from the grant date.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our with our financial statements for the nine months ended September 30, 2015, the year ended December 31, 2014, and the year ended December 31, 2013 together with notes thereto. In addition to historical information, this discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited, to those set forth under "Risk Factors" and elsewhere in this Quarterly Report on Form 10-Q.

Unless otherwise provided in this Quarterly Report, references to "we," "us," "our" and "Nemus" in this discussion and analysis refer to Nemus Bioscience, Inc., a Nevada corporation formerly known as Load Guard Logistics, Inc. ("LGL"), together with its wholly-owned subsidiary, Nemus, a California corporation ("Nemus"). Nemus became the wholly owned subsidiary of Nemus Bioscience, Inc. through the closing of a reverse merger transaction (the "Merger") pursuant to which a wholly owned subsidiary of LGL formed solely for the purpose of the Merger merged with and into Nemus and LGL changed its name to Nemus Bioscience, Inc.

The Merger is accounted for as a reverse merger and recapitalization, with Nemus as the acquirer and LGL as the acquired company for financial reporting purposes. As a result, the assets and liabilities and the operations that will be reflected in the historical financial statements prior to the Merger will be those of Nemus and will be recorded at the historical cost basis of Nemus, and the consolidated financial statements after completion of the Merger will include the assets and liabilities of LGL and Nemus, the historical operations of Nemus and the operations of the combined enterprise of LGL and Nemus from and after the closing date of the Merger.

Overview

We are a biopharmaceutical company focused on the discovery, development, and the commercialization of cannabis-based therapeutics, or cannabinoids, through our partnership with the University of Mississippi, or UM. UM has held the only contract to cultivate cannabis for research purposes on behalf of the Federal Government since 1968, and it has significant expertise in cannabis cultivation and the extraction, separation, process and manufacture of cannabis extracts. We are currently UM's sole partner for the development and commercialization of drugs derived from cannabis extracts, or cannabinoids, and the realization of this partnership will depend on the successful navigation of the complex regulatory framework for the cultivation and handling of cannabis in the United States.

Recent Events

On September 29, 2014, the Company executed three license agreements with UM pursuant to which UM granted us exclusive, perpetual, worldwide licenses, including the right to sublicense, to intellectual property related to UM5050, a pro-drug formulation of tetrahydrocannabinol, or THC for products administered through each of ocular, oral or rectal delivery. The license agreement for the field of oral delivery also includes rights to UM 1250, a bio-adhesive hot melt extruded film for topical and mucosal adhesion application and drug delivery. The license agreements contain certain milestone and royalty payments, as defined therein. These licenses also require the Company to reimburse UM for patent costs incurred related to these products under license. In the case of the ocular license the Company was required to reimburse sunk patent expenses of \$70,678 in February 2015; this amount was reflected in accrued license and patent reimbursement fees as of December 31, 2014. These license agreements will terminate upon expiration of the patents, breach or default of the license agreements, or upon 60 days written notice by the Company to UM.

On October 15, 2014, we signed a renewable option agreement for the rights to explore other routes of delivery of UM5050 not yet agreed upon and/or in combination with other cannabinoids or other compatible compounds. There was a one-time up-front option payment and the option period was for six months expiring on March 31, 2015. On September 29, 2015, the Company exercised its right to renew for an additional six months under the same financial terms and conditions.

On July 1, 2014, the Company entered into three additional Option Agreements, pursuant to which UM granted Nemus three-month exclusive options for conducting due diligence on the following three cannabinoid extracts to exclusively license them for the purposes of obtaining FDA approval and commercializing the extracts:

- 1) UM 1490 transmucosal delivery of cannabinoids
- 2) UM 5070 treatment for methicillin-resistant Staphylococcus aureus (MRSA) infections
- 3) UM 8790 ocular delivery of cannabinoids

In March of 2015, in lieu of a license agreement, the Company entered into a research agreement with UM to begin studies concerning the medical utility of cannabinoids as anti-infective therapeutics for MRSA. The fee payable to UM under the agreement is based on the achievement of certain milestones in the project. The Company recognized \$18,673 and \$66,747 of research and development expense for the three and nine months ending September 30, 2015 which represents work completed to date under this contract. The agreement also grants an exclusive option to license the technology from the University within 180 days from the commencement of the agreement. Either party may terminate the agreement with 30 days written notice.

In July of 2015, the Company entered into a research agreement with UM to begin studies concerning research and development of cannabidiol (CBD) formulations. The fee payable to UM is based on the achievement of certain milestones in the project. The Company recognized \$37,119 of research and development expense for both the three and nine months ending September 30, 2015 which represents work completed to date under this contract. The agreement also grants an exclusive option to license the technology from the University within 180 days from the commencement of the agreement. Either party may terminate the agreement with 30 days written notice.

In September of 2015, the Company entered into a research agreement with UM to advance NEMUS' lead proprietary cannabinoid-based therapy (UM5050) developed for the treatment and management of glaucoma into an optimized once-daily treatment formulation. The fee payable to UM is based on the achievement of certain milestones in the project. The Company recognized \$21,496 of research and development expense for both the three and nine months ending September 30, 2015 which represents work completed to date under this contract. The agreement also grants an exclusive option to license the technology from the University within 180 days from the commencement of the agreement. Either party may terminate the agreement with 30 days written notice.

Critical Accounting Policy and Estimates

Our Management's Discussion and Analysis of Financial Condition and Results of Operations section discusses our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments, including those related to revenue recognition, accrued expenses, financing operations, and contingencies and litigation. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. The most significant accounting estimates inherent in the preparation of our financial statements include estimates as to the appropriate carrying value of certain assets and liabilities which are not readily apparent from other sources.

During the quarter ended September 30, 2015, there were no significant changes to the items that were disclosed as our critical accounting policies and estimates in Note 1 to our financial statements for the year ended December 31, 2014 contained in our Form 10-K as filed with the SEC on March 27, 2015.

Results of Operations

For the three months ended September 30, 2015 and 2014

Revenues. To date, we have not generated any revenues, and do not expect to generate any revenue from the sale of products in the near future.

Operating expenses. For the three months ended September 30, 2015, our total operating expenses were \$896,292 as compared to \$857,613 for the three months ended September 30, 2014. The increase in operating expenses was due primarily to an increase in general and administrative costs consisting of consulting and professional fees in the three months ended September 30, 2015, as discussed below.

Research and development. Research and development expenses for the three months ended September 30, 2015 were \$152,288 which consisted of license fee renewals and contract R&D fees incurred by the University of Mississippi for the three outstanding research projects (MRSA, CBD formulation, and glaucoma treatment optimization).

For the three months ended September 30, 2014, our research and development expenses were \$195,000 which consisted of license fees payable to the University of Mississippi to obtain the rights to certain cannabinoid extracts and delivery mechanisms.

General and administrative. General and administrative expenses for the three months ended September 30, 2015 were \$744,004 which primarily consisted of consulting fees and professional fees associated with our costs of being a public company. By comparison, our general and administrative expenses for the three months ended September 30, 2014 were \$662,613 and consisted primarily of professional fees in order to prepare for becoming a public company along with fees paid to advisors.

Other income and expenses. For the three months ended September 30, 2015, the Company had non-operating expenses of \$286,000 which represented a change in the fair value of the conversion right related to the Series A preferred stock issuance. This loss was estimated by determining the highest probability of a per share price in the next anticipated round of financing after considering all discussions with bankers, potential investors and preliminary term sheets. This amount represents the incremental value of shares that would be required to be issued to the preferred stockholders in the event of a subsequent down-round financing.

For the three months ended September 30, 2014, other income and expenses were \$905.

Net Loss. For the three months ended September 30, 2015, we had a net loss of \$1,182,792, as compared to a net loss of \$858,518 for the three months ended September 30, 2014. We expect to incur net losses for the foreseeable future.

For the nine months ended September 30, 2015 and 2014

Revenues. To date, we have not generated any revenues, and do not expect to generate any revenue from the sale of products in the near future.

Operating expenses. For the nine months ended September 30, 2015, our total operating expenses were \$3,162,161 as compared to \$1,030,634 for the nine months ended September 30, 2014. The increase in operating expenses was due primarily to an increase in general and administrative expenses consisting of consulting and professional fees in the nine months ended September 30, 2015, as discussed below.

Research and development. Research and development expenses for the nine months ended September 30, 2015, were \$232,862 which consisted of license fee renewals, option expenses, and contract R&D fees incurred by the University of Mississippi for the three outstanding research projects (MRSA, CBD formulation, and glaucoma treatment optimization).

For the nine months ended September 30, 2014, our research and development expenses were \$195,000 which consisted of license fees payable to the University of Mississippi to obtain the rights to certain cannabinoid extracts.

General and administrative. General and administrative expenses for the nine months ended September 30, 2015 were \$2,929,799 which primarily consisted of consulting fees and professional fees associated with our costs of being a public company. By comparison, our general and administrative expenses for the nine months ended September 30, 2014 were \$835,634 and consisted primarily of professional fees in order to prepare for becoming a public company along with fees paid to advisors.

Other income and expenses. For the nine months ended September 30, 2015, the Company had non-operating expenses of \$986,000 which represented a change in the fair value of the conversion right related to the Series A preferred stock issuance. This loss was estimated by determining the highest probability of a per share price in the next anticipated round of financing after considering all discussions with bankers, potential investors and preliminary term sheets. This amount represents the incremental value of shares that would be required to be issued to the preferred stockholders in the event of a subsequent down-round financing.

For the nine months ended September 30, 2014, other income and expenses were \$905.

Net Loss. For the nine months ended September 30, 2015, we had a net loss of \$4,149,977 as compared to a net loss of \$1,031,539 for the nine months ended September 30, 2014. We expect to incur net losses for the foreseeable future.

Liquidity and Capital Resources

We had cash and cash equivalents of \$4,342,722 as of September 30, 2015, as compared to \$207,330 as of December 31, 2014. This increase was attributable to the completion of our Series B Preferred Stock financing which resulted in gross proceeds of \$5.0 million. We anticipate that we will continue to incur net losses into the foreseeable future as we continue to advance and develop a number of potential drug candidates into preclinical development activities and expand our corporate infrastructure which includes the costs associated with being a public company. Without additional funding, management believes that we will not have sufficient funds to meet its obligations beyond one year after the date the consolidated financial statements are issued. These conditions give rise to substantial doubt as to our ability to continue as a going concern.

We have been, and intend to continue, working toward identifying and obtaining new sources of financing. No assurances can be given that we will be successful in obtaining additional financing in the future. Any future financing that we may obtain may cause significant dilution to existing stockholders. Any debt financing or other financing of securities senior to common stock that we are able to obtain will likely include financial and other covenants that will restrict our flexibility. Any failure to comply with these covenants would have a negative impact on our business, prospects, financial condition, results of operations and cash flows.

If adequate funds are not available, we may be required to delay, scale back or eliminate portions of our operations or obtain funds through arrangements with strategic partners or others that may require us to relinquish rights to certain of our assets. Accordingly, the inability to obtain such financing could result in a significant loss of ownership and/or control of our assets and could also adversely affect our ability to fund our continued operations and our expansion efforts.

During the next twelve months, we expect to incur significant research and development expenses with respect to our products. The majority of our research and development activity is focused on development of potential drug candidates and preclinical trials.

We also expect to incur significant legal and accounting costs in connection with being a public company. We expect those fees will be significant and will continue to impact our liquidity. Those fees will be higher as our business volume and activity increases.

We anticipate that we will need to hire additional employees or independent contractors for our new laboratory at UM. We also anticipate that we will need to purchase or lease additional equipment for the Company's headquarters and laboratory facilities.

Off-Balance Sheet Arrangements

There are no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Not applicable.

Item 4. Controls and Procedures.

Evaluation of disclosure controls and procedures. We maintain controls and procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management including our principal executive and principal financial officers, as appropriate, to allow timely decisions regarding required disclosures. In designing and evaluating the disclosure controls and procedures, management recognizes that any control and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving the desired control objectives, and in reaching a reasonable level of assurance, management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

We conducted an evaluation, under the supervision and with the participation of our principal executive and financial officers, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based upon their evaluation and subject to the foregoing, the principal executive and financial officers have concluded that, as of the end of the period covered by this report, the disclosure controls and procedures were effective at a reasonable assurance level.

Changes in internal controls. Management determined there were no changes in our internal control over financial reporting that occurred during the fiscal quarter covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings.

To the best of our knowledge, we are not a party to any legal proceedings that, individually or in the aggregate, are deemed to be material to our financial condition or results of operations.

Item 1A. Risk Factors.

Investing in our common stock involves a high degree of risk. Our Annual Report on Form 10-K for the year ended December 31, 2014 includes a detailed discussion of our risk factors under the heading "Part I, Item 1A-Risk Factors." There are no changes from the risk factors previously disclosed in our Annual Report on Form 10-K. You should carefully consider the risk factors discussed in our Annual Report on Form 10-K as well as the other information in this report before deciding whether to invest in shares of our common stock. The occurrence of any of the risks discussed in the Annual Report on Form 10-K could harm our business, financial condition, results of operations or growth prospects. In that case, the trading price of our common stock could decline, and you may lose all or part of your investment.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

On July 3, 2015, the Company sold to four investors 180,000 shares of Series A Preferred Stock and warrants to purchase 36,000 shares of the Company's common stock at an exercise price of \$5.00 per share for a term of five years in exchange for aggregate proceeds of \$450,000, or \$2.50 per share. The issuance and sale of such shares was not registered under the Securities Act, and such shares were issued in reliance upon an exemption from registration afforded by Section 4(a)(2) of the Securities Act and Rule 506 of Regulation D promulgated thereunder. The Company relied on the exemption based on representations given by the investors.

On August 20, 2015, the Company sold to fifteen investors 5,000 shares of Series B Convertible Preferred Stock and warrants to purchase 6,250,000 shares of the Company's common stock at an exercise price of \$1.15 per share for a term of five years in exchange for aggregate proceeds of \$5,000,000, or \$1,000 per share The issuance and sale of such shares was not registered under the Securities Act, and such shares were issued in reliance upon an exemption from registration afforded by Section 4(a)(2) of the Securities Act and Rule 506 of Regulation D promulgated thereunder. The Company relied on the exemption based on representations given by the investors.

On August 25, 2015, the Company issued 187,500 warrants to purchase common stock at an exercise price of \$1.15 per share for a term of five years to its investment banker in exchange for services rendered in conjunction with the Series B Convertible Preferred Stock financing. The issuance and sale of such shares was not registered under the Securities Act, and such shares were issued in reliance upon an exemption from registration afforded by Section 4(a)(2) of the Securities Act and Rule 506 of Regulation D promulgated thereunder.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

None.

Certification of Principal Executive Officer, Required By Rule 13a-14(A) of the Securities Exchange Act of 1934, As Amended, As Adopted Pursuant To Section 302 of the Sarbanes-Oxley Act of 2002

I, Brian Murphy, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Nemus Bioscience, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting, which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
